Application No. 2008-1715-8
2. **Shore Media Group Inc.**

Application No. 2009-0005-2

1. **Windsor, Ontario** **Application No. 2008-1715-8**

Application by **Student Media, University of Windsor** (Student Media) to amend the broadcasting licence for the English-language community-based campus radio programming undertaking CJAM-FM Windsor, Ontario by changing the authorized frequency from 91.5 MHz to 99.1 MHz and the channel from 218LP to 256A and by decreasing the maximum average radiated power from 914 to 456 watts. Further, the antenna pattern will change from directional to omni-directional. All other technical parameters remain unchanged.

The Commission notes that the increase in power would result in a change to the status of CJAM-FM Windsor from that of an unprotected low-power service to that of a regular Class A service.

Following protracted negotiations between the Department of Industry and the FCC, Student Media is currently authorized to operate CJAM-FM with parameters that fall within those of a Class A station in spite of its unprotected status as a low-power FM station.

The licensee also proposes to change the authorized contours of the station by increasing the average effective radiated power from 4,200 to 5,200 watts (maximum effective radiated power from 8,000 to 10,000 watts with an effective height of antenna above average terrain of 600 metres).

The applicant stated that the proposed changes are required in order to alleviate interference caused by an American radio station.
