

NER98 Accuracy Standards Summary for Miracle Channel (CJIL-DT) 2024-2025

We are maintaining consistent NER98 accuracy through the use of an on-premise speech-to-text service called Lexi Local, from EEG Enterprises. This service allows us to compile a glossary of words with their phonetic spellings to produce more accurate speech-to-text live captions.

We are continuing to use the services of Halina Pashkievich as our evaluator, who was recommended as an approved and certified NER98 evaluator.

Based on the evaluations, we are able to review the errors produced by the EEG service in our live captions and adjust the glossary terms to improve future accuracy.

Below you will find attached our detailed report of this past broadcast year's results of our NER98 evaluations. The following link provides the accompanying video files mentioned in the report:
